

ROBIN KURIAN

FULL-STACK DEVELOPER

dev.robinkurian@gmail.com | +91 8848824751 | Bengaluru, India

LinkedIn | GitHub | Portfolio [↗](#)

Full-Stack Developer with 3+ years of experience in building scalable and user-friendly web applications using React, Next.js, Django, and other modern technologies. I specialize in delivering high-quality front-end and back-end solutions, solving complex problems, and continuously refining my skills. Passionate about delivering efficient, user-centered applications and eager to take on new challenges.

SKILLS

Next.js, React JS, Python, JavaScript, HTML5, CSS3, APIs, Django, Rest Framework, Tailwind-CSS, Bootstrap CSS, Git, PostgreSQL, Firebase, Flutter, WordPress, Docker, XML, ES6, Web Development - Responsive Design Principles, Webpack, Algolia, Cashfree, RDBMS, Odoo ERP.

WORK EXPERIENCE

MOBIUX: Senior Software Engineer, Full Stack (May 2023 – Dec 2024)

- Executed full development of an NPO's website, with advanced features resulting in a 10% increase in online donations from 240+ donors.
- Developed reusable components and optimized performance in Wakefield Trinity - Fixtures (Flutter), cutting code redundancy by 15%.
- Led Phase 2 development of UrjaDrishti project (Ministry of Power) using Django and Next.js, improving report generation efficiency by 10% and code quality by 15%.
- Contributed to a real estate management E-com app (Next.js 13), implementing multilingual support (i18n), modular UI components, and REST API integrations—improving app performance and user experience by 50%.
- Built UI for a headless CMS using Next.js 14, TypeScript, and a monorepo setup—focused on integration, data flow, and cross-browser support. Mentored two interns, accelerating delivery by 25%.
- Built optimized, reusable WordPress templates for Perfios and RightWalk, improving content management, reducing load times, and accelerating development by 50%.

CYBROSYS: Software Developer, Python Odoo JS (Mar 2022 – Mar 2023)

- Independently Built and launched a dynamic Odoo dashboard app with Postgres integration, enabling customizable layouts and improved data visualization—9.6K+ downloads and active users on the Odoo App Store.
- Delivered 20+ Odoo ERP apps to the Odoo Store, including backend-heavy tools like API-integrated E-COM modules (Sales, inventory, accounts included), Helpdesk-ticket management, POS, Odoo-Jira Connector, PDF generators for invoicing etc.—driving adoption, streamlining ops, and boosting client productivity.
- Built and delivered multiple client projects using Odoo, React, Next.js, and Django, while independently developing apps that strengthened full-stack skills and contributed to future-focused solutions.

CYBROSYS: Intern, Web Developer (Sep 2021 – Mar 2022)

- Completed a web technologies internship, gaining hands-on experience with Python, JavaScript, jQuery, HTML, CSS, Bootstrap 5, SQL, and React, developing 5+ applications and significantly enhancing coding skills.

STROKX TECHNOLOGIES: Web developer [Python-Django] (Nov 2019 – Nov 2020)

- Learned Django and Joined a Django project, contributing to feature development.
- Developed 3+ websites, including a movie streaming platform, gaining hands-on experience in full-stack web development.
- Mastered core web development principles, collaborating closely with developers to deliver high-quality projects.
- Enhanced technical expertise and communication skills through real-world project work and team collaboration.

AVODHA EDUTECH: Intern, Android development [Android, XML]

- Completed an Android development internship, mastering app architecture and fundamentals, and developed a Task Tracker app that garnered positive feedback.

EDUCATION

The University of Calicut: Bachelor of Computer Application (BCA)

(June 2016 - March 2019)

Modules: Web programming, Data Structures, RDBMS, Object Oriented Programming.

ACHIEVEMENTS

MOBIUX-Hackathon 2K24:

- Best Software Pitch Presentation (Team) Award
- Outstanding digital product (Team) Award

PERSONAL PROJECTS

E-commerce site: [Next.js15, Firebase]

Developed a live e-commerce website using Next.js and Firebase, incorporating features like product search with Algolia and responsive design with Tailwind CSS. Deployed on Netlify for seamless performance.

File-Organizer: [Electron, JavaScript, CSS]

Built a file organizer tool that automatically and manually sorts files by type (e.g., EPUB to eBooks, JPEG/PNG to Images), helping users maintain organized and clutter-free folders.
